An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Garth Dahlen on 9/<sup>27</sup>~~26~~/05.

The application has been amended as follows:

Claim 18, line 2, cancel "applying to a surface of a semiconductor" and insert --planarizing a surface of a semiconductor with--.

The following is an examiner's statement of reasons for allowance:

The prior art of record **fails** to teach or suggest a polishing slurry (chemical mechanical polishing slurry) which comprises all of the components in the amounts defined by independent claim 1. Specifically, the references are silent with respect to the use of **non polymeric** organic **particles** having the claimed size used in conjunction with the other components defined. The organic particles defined by the references are limited to **polymeric** particles (when used in conjunction with the other components defined instant claim 1). With respect to the method, the references are silent with respect to the use of **non polymeric** organic **particles** used in a planarization process to planarize the surface of a **semiconductor**. The examiner is interpreting "planarizing" to mean polishing (at least a part of) a semiconductor surface.
